

## Conch Cash Results

During the last Stock Island and Key Haven Livable CommuniKeys Community Meeting the planning staff coordinated a conch cash exercise with the residents.

The purpose of this exercise was to determine the kinds of future development residents supported. To assess this, each participant was given ten conch cash pieces. Then each participant was asked to mention a future development they would support, which was then written on an envelope. Once all the ideas were mentioned and recorded on the envelopes, each participant placed their dollars into the envelope that represented their development of choice.

Overall, a total of 290 dollars was spent by 29 participants. The results of this exercise are as follows:

- Commercial Fishing and dockage space for such activities was the number one development supported by the participants with a total of 40 conch dollars.

- A fire house was a close second place with a total of 39 conch dollars.

- The third most supported development choice was for a town hall with 33 conch dollars.

# Beauty is in the Eye of the Beholder Results

In addition to the conch cash exercise, participants were asked to identify things that could be done to improve the appearance of Stock Island and Key Haven.

Those things are listed below:

## 1. Trash Clean up

## 2. Addition of more trees

## 3. Improvements along US 1 with landscaping, lighting and an attractive entrance.
